Years driving digital transformation

10M

Professionals — global mission

1000s

Rural schools connected

Govt.

State & Central Government partnerships

Santosh Talaghatti is an Indian Scientist and Innovator with over 15 years driving large-scale digital transformation across India. He is a contributor to Digital India, Smart Cities and Smart Villages, and has connected thousands of rural schools with technology and global experts through e-Learning and Global Classrooms initiatives. He is currently engaged in Quantum Research & Development in the health sector — advancing AI and Quantum applications in medical device innovation and healthcare through Quantum World Ventures, aligned with India's National Quantum Mission. He founded Change Management Enterprise to unite AI, education, governance and empathetic leadership into one global movement, with a mission to empower 10 million professionals worldwide.

Domain Expertise

e-Learning & Digital Education

Global Classrooms connecting thousands of rural schools across India with global experts and AI-enabled learning.

Smart Villages & Rural Digitalisation

Contributor to Digital India, Smart Cities and Smart Villages — designing scalable, technology-enabled rural empowerment.

Digital India & e-Governance

Policy advisory and digital transformation with State and Central Government departments across capacity-building and R&D initiatives.

Quantum Technologies in Healthcare

Quantum & AI R&D for medical device innovation and health breakthroughs, aligned with the National Quantum Mission, via Quantum World Ventures.

Leadership & Ventures

- Founder & CEO — Change Management Enterprise
- Founder — Quantum World Ventures (Quantum & AI skilling)
- Champion — Namaskar with Love Foundation (rural & social impact)

Public Engagements

- CoCon Security Briefing — Digital India & e-Governance
- DIDAC & national education-technology exhibitions
- Government & industry partnership summits — with Dr. APJ Abdul Kalam

"Inspired by the vision of Dr. APJ Abdul Kalam, I believe technology, combined with purposeful capacity building, can transform institutions and empower individuals. That belief is the foundation on which CME was built — to bridge the gap between emerging technology and real-world readiness, one institution and one learner at a time."

Invite Santosh as a Guest Speaker (Online)

Available for online guest sessions, keynotes and expert panels on AI, Quantum Technology, Digital India, e-Governance, Rural Empowerment and Change Management. To request an appearance, write to ceo@changemanagemententerprise.com or call +91 70304 41000.
